

KN^e 3G

gear generating grinding machine

*e*fficient - *e*asy to use - *e*rgonomic

KAPP NILES

technical data

- | | |
|----------------------------------|-------------------|
| • max. tip diameter | 320 mm |
| • module range | 0.5 - 5 mm |
| • max. face width | 400 mm |
| • max. workpiece length | 600 mm |
| • helix angle | ±45° |
| • grinding worm diameter x width | 300 x 160 mm |
| • floor space incl. periphery | 22 m ² |

distinctive features

- best price performance ratio in its class
- ideal replacement of obsolete generating grinders
- intuitive **KN^{grind}** software with touch screen HMI
- ideal ergonomics, all operator tasks within reach from floor
- integrated measuring device for optimised set-up
- shortest delivery time by standardised machine concept
- electrical cabinet attached for minimum installation time
